Student accounts on a12

Each group has its own student account on a12. These accounts need to cleared every semester. This task is automated by the following script:

```
~pollux/opt/del_accounts.bash .
```

This script deletes the student accounts and saves a backup of the corresponding HOME directory in:

```
~/pollux/cleanup/ .
```

Therefore, it needs to be executed with super user rights. This script expects two or three arguments.
